

Vinicius PARAIZO

Full Stack Engineer

Italian citizen, holder of a Bachelor's degree (4-year program) in Computer Science and winner of the INOVA Brasil national competition, I am currently seeking a remote/hybrid job opportunity in Web Development / Full Stack.

AWARDS AND HONORS

- **1st prize — INOVA (Telebrasil), 2025/2026 :** Winner of a national competitive programming contest among 44 participants. [🔗 INOVA](#)
- **Highest grade (20/20) for Bachelor's thesis, 2025 :** Awarded unanimously by the examination committee. Developed a [🔗 Dee p Embedded Clustering](#) model for the categorization of public expenditures of the State of Rio de Janeiro. Achieved a Silhouette Score of 0.9172.
- **Manuscripts in Preparation**
 - scRNA-Seq Analysis [🔗 Github](#)
 - Public Expenditure Auditing: A Natural Language Processing (NLP) Approach [🔗 Abstract](#)

TECHNICAL SKILLS

- **Languages/Frameworks :** Python, TypeScript, Java, C#, C++, Ruby, PyTorch, Tensorflow, LangChain, FastAPI, Spring, .NET, React, Angular, Vue.js, Vite, Next.js, Nodejs, Tailwind, SQLAlchemy MongoDB, Supabase, Vercel, Bash
- **Areas of Expertise :** AI & DL, NLP, LLMs, AI Agents, Frontend & Backend Development, Database Management, Website deployment, Docker, Cloud Computing
- **Teaching Experience :**
 - Teaching Assistant for Data Structures in C++ (2021–2022)
 - [🔗 Youtube Channel](#) featuring theoretical content on Deep Learning

LANGUAGES

- **Portuguese :** C2 (natif)
- **French :** C1
- **English :** C1 (IELTS)
- **Italian :** B2
- **German:** A2

PROFESSIONAL EXPERIENCE

▶ Agentic AI Developer — CDI (Portuguese and English)

Prime Up | Rio de Janeiro, Brazil | 10/2025 – 06/2026

- Developed agentic AI systems for BNY based on multiple reasoning architectures, including the design of Retrieval-Augmented Generation (RAG) pipelines with LangChain and the integration of AWS Bedrock APIs for response generation.
- Implemented an internal conversational AI agent using IBM Watson, capable of reasoning and dynamically invoking different tools based on user requests, with security mechanisms that filter retrieved document chunks according to user permissions.
- Developed backend components in Python, deployed applications with Docker, integrated IBM Cloud services, and built frontend interfaces using React.

▶ Full Stack Developer - CDD (Portuguese and English)

Anouk Partners | Rio de Janeiro, Brazil | 07/2025 – 10/2025

- Contributed to a full-stack dockerized application comprising a Next.js frontend, a Java Spring backend, external APIs, and relational database integration.
- Developed frontend components in collaboration with a team of senior engineers, following Agile methodologies and Git version control best practices.

▶ AI Developer (French and English)

Euranova | Marseille, France | 08/2024 – 02/2025

- Developed a structured methodology to improve efficiency across all stages of the AI development lifecycle.
- Applied this methodological framework to a LangChain-based RAG project (Qdrant vector store) powered by LLMs, with a focus on reducing computational resource consumption.

▶ Machine Learning Intern (French)

TALEP | Marseille, France | 02/2024 – 05/2024

- Leveraged a pretrained HuBERT model to process MP3 audio datasets, perform speech recognition tasks, and extract MFCC features for further analysis.
- Conducted in-depth research on Large Language Models (LLMs) and Transformer architectures, evaluating state-of-the-art methodologies and their applicability to audio processing.

▶ Systems Intern (Portuguese and English)

VTEX | Rio de Janeiro, Brésil | 08/2022 – 08/2023

- Developed a Python automation tool that automatically updated the company's procurement database using Selenium and OpenPyXL.

EDUCATION

▶ Master 1 Informatique (Exchange Program) (French)

Aix-Marseille Université | Marseille, France | 2023 - 2024

▶ BSc Computer Science (ECTS: 240) (Portuguese)

Federal University of Technology of Rio de Janeiro (CEFET) | Rio de Janeiro, Brazil | 2019 - 2025

- Bachelor's **Thesis:** Auditing Public Expenditures: A Natural Language Processing (NLP) Approach
- Completed two Master's-level courses (equivalent to the first year of a Master's program) concurrently with the Bachelor's degree.
- **Overall GPA: 8.04/10** (equivalent to High Honors / First-Class standing).
